A publication of the Government Statistical Service

The Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ, Telephone 01-233 6135/6193

Enquiries about orders and subscriptions for the *Monthly Digest of Statistics* and other Central Statistical Office publications should be made to:

Her Majesty's Stationery Office, PO Box 276, London SW8 5DT. (Telephone: 01-211 8667, 8668 or 8673 for subscriptions: 01-211 0363 for standing orders: 01-622 3316 for orders).

Introduction

This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the *Digest* are mainly totals for calendar months or monthly averages.

Provisional data

Some figures in *Monthly Digest* are provisional and may be subject to revision in later issues. This applies particularly to data for the most recent time periods.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed definitions of all the terms and units used in the Digest. The following general definitions should be noted in using the Digest.

Area covered. Except where otherwise stated, all statistics relate to the Unite⁻¹ Kingdom of Great Britain and Northern Ireland.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the Supplement to the Digest. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

- .. not available
- nil or less than half the final digit shown
- * average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be a slight discrepancy between the sum of the constituent items and the total as shown.

Recent data

Figures for recent periods in a number of tables have been affected by the dispute in the coal mining industry and should be used with caution.

1. The working population consists of the employed labour force and the unemployed (claimants); the employed labour force includes employers, self-employed and HM Forces as well as employees in employment.

2. From April 1983, the figures of unemployment reflect the effects of the provisions in the Budget for

some men aged 60 and over who no longer have to sign at an unemployment office.

3. Estimates of employees in employment up to June 1984 take account of the results of the 1983 and 1984 Labour Force surveys. Estimates for later periods include an allowance for continued undercanting (see the article on page 114 of the March 1985 Employment Gazette). Estimates of the self-employed up to mid 1984 are based on the results of the 1981, 1983 and 1984 Labour Force surveys. The provisional estimates from September 1984 are based on the assumption that the average rate of increase between 1961 and 1964 has continued subsequently. A detailed description of the current allowances is given on page 114 of the March 1965 Employment Gazette.

4. HM Forces figures, provided by the Ministry of Defence represent the total number of UK service personnel, male and female, in HM Regular Forces, wherever serving and including those on release leave. The numbers are not subject to seasonal adjustment.

1. Excluding private domestic service.

2. Includes Divisions 1–5 of the Standard Industrial

Classification 1980. 3. The estimates for agriculture are taken from the censuses of agriculture and exclude a small number of employees of agricultural machinery contractors. 4. Excluding members of HM Forces. 5. See footnote 2 to Table 3.3.

Regard must be taken of the effect of seasonal patterns and differences in planned annual intake levels in any comparisons of quarterly or annual intakes.
 Some personnel have a liability for Reserve service. The figures include deaths.
 The differences between strengths at successive dates may not match the intake and outflow figures for corresponding periods because of delays in recording transfers between the Services and similar occurrences.

Percentage rates have been calculated by expressing the total numbers unemployed as percentages of the numbers of employees (employed and unemployed) at the appropriate mid-year.
 From April 1 1983, figures are affected by the 1983 Budget provision for some men aged 60 and over

who no longer have to sign on at an unemployment benefit office.

3. The seasonally adjusted series has been revised. Past seasonally adjusted figures (up to August 1983) are now adjusted for discontinuity in particular for the effect of the 1983 Budget which means that certain men aged 60 and over, no longer need to sign on at an unemployment benefit office. Details of the new series are described in an article 'Unemployment adjusted for discontinuities and seasonality' in the July issue of Employment Gazette.

^{4.} There was a discontinuity between the June and August figures for unemployed claimants in Northern Ireland. The monthly count is based on the Northern Ireland Department of Economic Development's computer records; a reconciliation with information on claims for benefit held in DHSS Social Security offices has shown some people included in the monthly count who were no longer claiming benefit and some (a smaller number) who had not yet been included in the count even though they were claiming benefit. The net result was that the unadjusted July and August figures for Northern Ireland, were 5 700 and 5 150 less respectively than they would have been without the reconciliation. If the figures had continued to be recorded as in June and earlier months there would have been increases in unemployment of about 3 150 in July and 650 in August. To assist in the interpretation of current trends, the discontinuity has been taken into account in producing the seasonally adjusted estimates. For the time being this has been done by adding the effect back into the seasonally adjusted figures. In due course monthly estimates of the accumulating discrepancy since the present computer system was set up in October 1982 will be calculated and incorporated in a revised seasonally adjusted series, so that it is consistent with the more accurate coverage of the current unadjusted data.

Employment Gazette.

1. About one third of all vacancies are notified to Jobcentres. These could include some that are suitable for young persons and similarly vacancies notified to careers offices could include some for adults. Because of possible duplication the two series should not be added together. The figures represent only the number of vacancies notified by employers and remaining unfilled on the day of the count.

z. Included in South East.
3. Vacancies on Government schemes are not separately identified for Northern Ireland.
4. The statistics of vacancy stocks were distorted in April and May because of a change in MSC's Employment Division's administrative arrangements. This led to an artificial increase in the April (March 29) level of unfilled vacancies, but the recorded stocks of unfilled vacancies for May should be minimally

^{5.} Includes vacancies on the Community Enterprise Programme, the forerunner of Community Programme.

Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the
total number of working days lost exceeded 100. There may be some under-recording of small or short
stoppages; this would have much more effect on the total stoppages than on working days lost. The figures
for 1985 are provisional.

^{2.} Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.
3. The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

Including coke and Natural Gas.
 Including quantities used in the production of steam for sale.
 Including oil used in gas turbine and diesel plant and for lighting up coal-fired boilers.
 Including generation by gas turbine, diesel and hydro-electric plant.
 Used on works and for pumping at pumped storage stations.
 Including net imports and purchases from outside sources mainly UKAEA and British Nuclear Fuels.

^{1.} Years ended 31 May.
2. Nutrient content.
3. Total weight of compound fertilisers.
4. Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year—see explanatory notes in the Supplement of Definitions and Explanatory Notes.
5. Figures relate to sales by manufacturers in the United Kingdom who are classified to AH 2581 (Soap and synthetic detergents) previously MLH 275, and who from the first quarter 1981 employ 50 or more, replacing the previous employment level of 25. From the first quarter 1960 figures exclude sales of household cleaning liquid detergent and from the first quarter 1981 sales of paste synthetic detergents.

1. Figures relate to sales by UK manufacturers employing 75 or more persons from 1st quarter 1981 replacing the

previous employment level of 25.

2. Figures from 1st quarter 1983 to 4th quarter 1983 for products of condensation, polycondensation and polyaddition

regures from 1st quarter 1985 to 4rd quarter 1985 for products of concensation, polycondensation and polyadidate exclude polyamides and silicones. A comparable figure for 4th quarter 1982 would be 132.4.
 Figures from 1st quarter 1983 for cellulosics and other plastics and modified natural resins consist only of regenerated cellulose film; an equivalent figure for 4th quarter 1982 would be 13.5.
 From 2nd quarter 1983, figures for intermediate forms between the resin and semi-fabricated stages exclude mouldings and extrusion compounds of phenolics. A comparable figure for 1st quarter 1983 would be 55.9.
 Figures from 1st quarter 1984 exclude flexible and rigid foam for semi-finished products. A comparable figure for

4th quarter 1983 would be 145.6.
6. Figures from 1st quarter 1984 for semi-finished products exclude copper clad and glass based industrial laminated themosetting sheet and extruded flexible plasticised film. A comparable figure for 4th quarter 1983 would be 108.5.

1. Includes naval vessels registered as merchant ships.

2. Gross tonnes is a constructed measure of the volume of all the enclosed spaces in a vessel except those

occupied by engines, bunkers and crew.

3. The total tonnage specified on ordering vessels differs slightly from total actual measured tonnage on

completion.

4. Vessels are shown for export if they are for other than UK registration.

5. Modifications include alterations of 500 gross tonnes or more to the tonnage and the country of registration of vessels already on order.

6. From Q1 1984 gross tonnage conforms to 1969 International Maritime Organisation Convention on tonnage measurement of ships.

7. Registration moved from UK to overseas.
8. Modifications and cancellations equal new orders for the period.
9. Modifications and cancellations exceed new orders for the period.

Including the Commission for the New Towns and new town development corporations: in Scotland the Scottish Special Housing Association and, in Northern Ireland, the Northern Ireland Housing Executive.

2. Housing associations, other than the Scottish Special Housing Association and local authorities acting other than under Housing Act powers and government departments.

3. Owing to the re-organisation of Scottish local government in May 1975, the permanent house building figures for Scotland are presently subject to some distortion.

4. Under construction figures are not strictly comparable with those for earlier periods.

^{1.} Freight train traffic only.

^{1.} The four-weekly averages for each year are computed from calendar year totals.
2. From January 1984 figures for British Rail show 'sponsored' journeys, not 'originating' journeys. A 'sponsored' journey is a journey on any Business sector of BR irrespective of the Business sector on which the journey originated.
3. Excludes journeys by Motorail services.
4. On annual season tickets, journeys are estimated at the rate of 480 per annum; on other season tickets, 540 per annum.
5. Journeys on all season tickets are estimated at the rate of 600 per annum.

Statistics of visible trade on a balance of payments basis (shown in Table 16.1) are obtained by making certain
adjustments in respect of valuation and coverage to the statistics recorded in the Overseas Trade Statistics.
These adjustments are described in detail in United Kingdom Balance of Payments 1983 Edition.
 Export unit value as a percentage of the import unit value index.

^{1.} Items valued at less than £200 have not been allocated to specific countries and areas.

1. The ratios were first introduced in an article in the August 1977 edition of Economic Trends 'The Home and Export Performance of United Kingdom Industries' which described the conceptual and methodological problems

Performance of United Kingdom Industries' which described the conceptual and methodological problems involved in measuring such variables as 'import penetration'. The latest ratios for full detail within manufacturing (over 200 AHs) are shown in business monitor MQ12 Import Penetration and Export Sales for Manufacturing Industry. An article in Economic Trends giving a longer back run of the ratios on a Standard Industrial Classification 1980 basis is planned for release at a later date.

2. The calculation of the ratios is inappropriate for certain industries. In such cases, and where suitable data are not available, the industry has been omitted from the analysis. The Activity Headings concerned are: AH2247.2 Precious metals, AH 2396(pt) Unworked precious stones, AH2436 Ready-mixed concrete, AH3138 Heat and surface treatment of metals, AH3246 Process engineering contractors, AH3480 Electrical equipment installation, AH4121 Slaughterhouses, AH4370 Textile finishing, AH4560 Fur goods, AH4672 Shop and office fitting, AH4910 Jewellery and coins, AH4930 Photographic and cinematographic processing laboratories.

Assets: increase -/ decrease +. Liabilities: increase + / decrease -. Excluding official financing.
 Excluding trade credit between related firms (part of United Kingdom and overseas private investment).
 Excluding changes in levels resulting from changes in sterling valuation: see notes on pages 40 and 52 of UK Balance of Payments 1985 Edition.
 Prior to 1982 includes transactions by 'other financial institutions'. For 1982 onwards these data relate only to transactions reported by UK monetary sector institutions. Transactions by 'other financial institutions' are included within 'other external borrowing or lending'.
 Sterling reserves of overseas countries and international organisations, other than the IMF, as reported by UK banks, etc. in the United Kingdom.
 Excluding credit for UK exports.
 From 1982 onwards included transactions by 'other financial institutions' (see footnote 4).
 The estimate included for the latest quarter excludes a substantial part of the private sector borrowing from and lending to banks, etc., overseas.

The rates at which the reserves are valued in dollars are revised annually. Convertible currencies and SDRs are valued in the average of the middle market closing rates in the three months to end-March, or at their actual dollar value on the last working day of March, whichever is the lower. Gold is valued at the average of the London fixing prices for the three months up to end-March less a 25 per cent discount or at 75 per cent of its final fixing price, on the last working day of March, whichever is lower. Data denominated or expressed in dollars are converted to sterling at end-period middle-market rates.

2. Drawings from the IMF, excluding interest and charges and net of repayments to and drawings from the IMF by other countries in sterling. This item also excludes transactions which affect the UK reserve position in the IMF, which is included within official reserves.

3. Official financing liabilities are first valued in US dollars at the rate used in valuing the convertible currencies element of the reserves, and are then, like the US dollar total of the reserves, translated at sterling at end-period middle-market rates. reserves, translated at sterling at end-period middle-market rates.

for M2 are the levels as at the mid-December dates; the figures for broad money (£M3 and PSL2) are the levels as at 31 December. For broad money, the
figures for end-December 1981 show, in the first line, levels on the basis of the old banking sector and in the second line, on the basis of the new monetary
sector. Banking sector levels at end-December 1981 are partly estimated.

The figures for M0 are the changes between the average levels in the banking months ending in the dates shown.

^{1.} The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

Note: The purpose and methodology of the Tax and price index were described in an article in the August 1979 issue of Economic Trends and in the September Economic Progress Report published by the Treasury. The purpose is to produce a single index which measures changes in both direct taxes (including national insurance contributions) and in retail prices for a representative cross-section of taxpayers. Thus, while the Retail prices index may be used to measure changes in the purchasing power of after-tax income (and of the income of non-taxpayers) the Tax and price index takes account of the fact that taxpayers will have more or less to spend according to changes in direct taxation. The index measures the change in gross taxable income which would maintain after tax income in real terms.

1. These figures reflect the late timing of the 1979 budget.

Index numbers constructed on a net sector basis, i.e. transactions within sector are excluded.
 Index numbers are compiled exclusive of VAT. Revenue duties on cigarettes, tobacco, alcoholic liquor, matches and mechanical lighters are included. Duty on hydrocarbon oils is included in series for materials and fuel purchased by broad sectors of industry but excluded from output price series.

England and Wales only.
 Because of a dispute in the steel industry, insufficient information is available to enable a reliable index for 'metal processing and manufacturing' to be calculated, but the best possible estimates have been used in the compilation of the indices for manufacturing and whole economy. The index series for this group has a base of April 1980=100.
 Provisional.
